- I learned more from the TA sections then I did from the actual professor sections, and I believe that his presentation of information and going over different problems really helped over this quarter.
- Good

- Dawei was an amazing TA. At the beginning of the quarter he was holding live discussions since the professor asked him to and still recorded it for the students that did not attend. A couple weeks into the quarter he decided to start pre recording the discussion sections and posted them on Wednesday since it usually went over the homework that was due on Friday. This was very helpful as I was able to understand how to do the homework after watching the discussion video. I do wish that Dawei would make comments on the homework on which problems were wrong or why I lost points if I did. Dawei was very effective as a teacher because it seemed to make a lot more sense when he was explaining it compared to the lecture videos from the professor. Overall, Dawei was a big reason why I did so well in the class and enjoyed it.
- Dawei is an amazing TA. He is always helpful in answering questions that the students would have. His videos are clear and insightful. His teachings always helped me prepare for course quizzes and exams.
- Good TA. Sometimes was a little hard to understand, but didn't hold him back from clarifying the material.
- nothing
- Best TA I ever had!
